

RAC Maintenance Committee

August 18, 2020, Status Report

After attempting to reschedule our August meeting because of the unavailability of key attendees, the reschedule meeting had to be canceled due to a confluence of doctor's appointments, vacations, meeting conflicts, and COVID-19 caution.

Siby provided an updated Database Report to the Committee earlier in the month. On that report, approximately (40) issues were reported as completed since our July meeting.

Also earlier in the month, some Maintenance Committee members were able to canvass their assigned areas. These new identified issues were listed in a special integrated list which has been provided to Siby and his group. Any of these issues which are still open will be discussed at our September meeting.

Hopefully, conditions and member availability will be such that we will be able to hold our September meeting as scheduled.

Doug Atkins/Chair

Jerry Titsworth/Sec
